IDENTIFIERS Weekly Student Contact Hours

ABSTRACT

This report presents weekly student contact hours (WSCH) in disciplines and instructional programs for the Los Angeles Community College District. Data are presented for both day and evening classes for the fall semester of each academic year from 1972 to 1976 for each instructional discipline and for each program within the discipline. A list of instructional programs comprising each discipline is included. Districtwide, fall 1976 WSCH dropped 14.4% from the previous year, a decline attributed to a sharp reduction in veteran enrollment, improved attendance accounting procedures, effects of the 1975-76 "cap" on apportionment growth, and no increase in the district population base. Overall, Business and Management was the largest and Social Science the second largest discipline in 1976, although both showed declines from the previous year. Disciplines showing the largest increases over the last five years included Interdisciplinary Studies, Communications, Library Science, and Home Economics, while the largest decreases were reported in the disciplines of Architecture, Letters, Physical Sciences, and Social Science. A listing of programs dropped and added between 1972 and 1976 is included and it is noted that, in fall 1976, the district offered 226 instructional programs as compared to 214 in 1972. (JDS)

GLOSSARY

Census is a fixed time during the semester when counts of enrollment and weekly student contact hours are taken for State reporting purposes. There are currently two census weeks per semester.

Classification of Instructional Disciplines (CID) codes are a system of four-digit numbers used throughout California for the classification of disciplines and instructional programs. CID codes define 23 major disciplines as distinguished by the first two digits of the code. Specific instructional programs within each discipline are identified by the last two digits of the code.

Day classes are those classes beginning before 4:30 p.m.

Disciplines are major subject fields composed of a number of instructional programs.

Evening classes are those classes beginning at 4:30 p.m. or later.

Full-time Equivalent (FTE) Enrollment is derived by dividing WSCH by 15. One full-time equivalent student represents 15 credit hours in scheduled instruction.

Instructional Programs or Programs are organized sequences of courses covering related subject matter and comprising a Discipline.

Weekly Student Contact Hours (WSCH) are computed by multiplying the number of students enrolled in a class by the number of hours per week for which the class meets. A class with ten students which meets three times a week would thus generate 3 x 10 or 30 WSCH.

SUMMARY AND ANALYSIS OF FINDINGS

This Research Report presents weekly student contact hours (WSCH) in disciplines and instructional programs for the District and for each college in the District. Data are presented for both day and evening classes for the Fall semester of each academic year from 1972 to 1976. It is intended that these data will serve as a reference to colleges in the areas of curriculum planning, faculty workload analysis, and resource allocation.

Data are presented for each instructional discipline as well as for each program within the discipline, as identified by Classification of Instructional Discipline (CID) codes (See Glossary). A complete list of the instructional programs comprising each discipline is provided on pages 6 through 11.

Data for Fall 1972 through Fall 1974 were taken from CCAF-132, Enrollment and Faculty by Discipline; data for Fall 1975 and Fall 1976 were taken from the WSCH By Subject report. Information on both of these reports is provided by the colleges via their inputs to the Section Data Base.

Districtwide, Fall 1976 weekly student contact hours (WSCH) declined 14.4% from the previous Fall. This decline can be attributed to several factors: (a) sharp reduction in enrollment of veterans, who tend to take heavy loads; (b) the recent improvement of attendance accounting procedures via exclusion rosters and other means; (c) lingering effects of the 1975-76 "cap" on District apportionment growth; (d) reduced incentives for enrollment growth under the SB-1641 state funding structure; and (e) no increase in the population base from which students are drawn. Since most programs exhibited a decline in Fall 1976, this report will address itself primarily to trends in discipline and

program popularity over the five-year period, rather than concentrating on the current year.

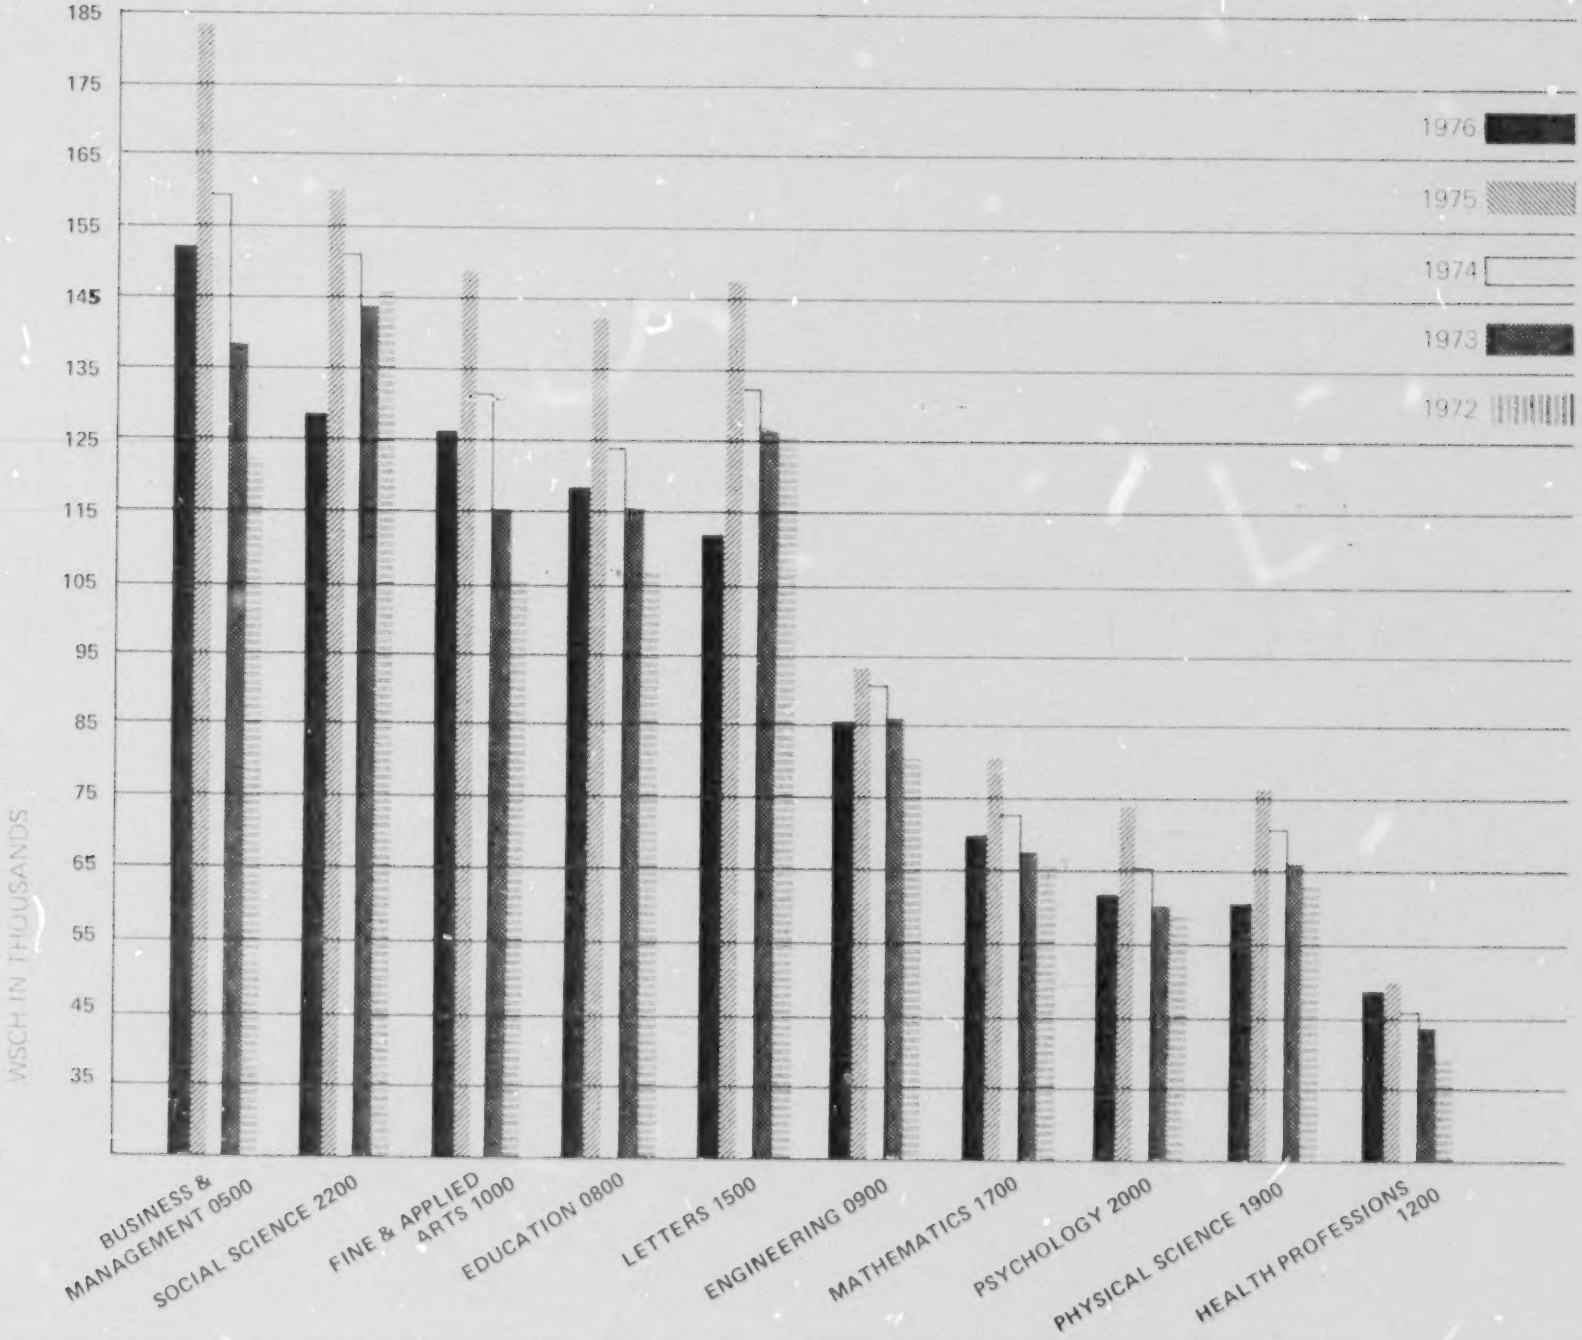
WSCH from 1972 to 1976 in the District's ten largest disciplines are presented in Figure 1. For the most part, the ten largest disciplines in the District have maintained their same relative position since 1972.

Although Business and Management (0500) experienced a decline this year, it is still by far the largest discipline in the District. Within this discipline the largest programs are Secretarial Science (0514) and Accounting (0502), together comprising nearly 50% of the total WSCH in the Business and Management discipline in Fall 1976. Furthermore, several programs within this discipline--Restaurant Management (0508), Real Estate (0511), Travel (0542), Escrow (0591), and Hotel & Motel Management (0595)--experienced increases in WSCH in excess of 100% since Fall 1972.

The second largest discipline in the District, Social Science (2200) exhibited a 1976 decline (20.3%) in excess of the overall District decline causing it to fall below its 1972 level of WSCH.

Disciplines showing the largest increases over the last five years include Interdisciplinary Studies (4900), Communications (0600), Library Science (1600), and Home Economics (1300). The sharp increase in Interdisciplinary Studies was due to the addition of the Personal Development (4930) program in 1974. The largest increases within the Communications and Home Economics disciplines were in the Television (0603) and Child Development (1305) programs. The Library Science discipline consists of only the one program, which has increased 61.6% since Fall 1972.

Figure 1 **TEN LARGEST DISCIPLINES**



Disciplines whose Fall 1976 WSCH fell below the Fall 1972 level include Architecture (0200), Letters (1500), Physical Science (1900), and Social Science (2200).

Programs exhibiting the largest declines since Fall 1972 were Electronics Technician (5383), Welding (5341), and Graphic Arts Management (1037). In addition, four of the five new programs in the Engineering (0900) discipline have declined below their initial year's enrollment.

For the purposes of this report, programs "added" refers to those programs generating WSCH for the first time. Similarly, programs "dropped" refers to those programs which have stopped generating WSCH. Between Fall 1972 and Fall 1976 the District added 28 new programs and dropped 19. A listing of the programs added and dropped is provided on pages 12 and 13, respectively. The college at which the program was first added or from which it was last dropped is also indicated. In Fall 1976 the District offered a total of 226 instructional programs, compared to 214 in 1972.

For the purposes of curriculum planning, in a period of declining enrollment it is especially necessary to identify those programs experiencing unusually rapid declines. Once these potentially "marginal" programs are identified, the college can take steps to increase their enrollment, or perhaps modify or eliminate them from its curriculum. Although most disciplines experienced decreases in Fall 1976, they should not all be considered marginal. Many of these disciplines experienced increases during the first four years, and a decrease only in the fifth year. The Office of Instructional Development is engaged in a current study of program vitality that includes the identification of marginal programs.

Faculty workload analysis involves planning present and future staffing assignments in the various academic areas. Since this planning requires the colleges to anticipate future enrollment in each program, it is important to be able to recognize trends as early as possible in the planning process. Discipline and program faculty loads are discussed in Research Report #76-07, A Comparison of District and Statewide Faculty Loads: Fall 1972-Fall 1975. More detailed statewide data are contained in the annual California Community Colleges Presidents' Study of Teaching Loads, compiled and published by Semans, Mueller and Associates. The most significant aspect in the 1976-77 enrollment picture is the 13% decrease in faculty loads (defined as WSCH divided by FTE faculty) experienced in Fall 1976.

Early identification of trends in program popularity are also important in resouce allocation. Since 1976-77 ADA was substantially lower than had been projected, it is apparent that budgetary effects will soon be felt by all segments of the District. Programs undergoing severe WSCH declines would seem unusually vulnerable in this respect.

A more complete discussion of the implications of current enrollment and WSCH trends may be found in Research Report #77-03, Enrollment and Attendance: 1967-1977.

Districtwide WSCH information may be found on pages 16 - 83. Data for disciplines are presented prior to data for instructional programs within those disciplines. Data for individual District colleges follow the District section, with each college printed on a different color of paper.
